

Meco Equipment Engineers B.V.

Meco Equipment Engineers B.V. is part of the international and listed BE Semiconductor Industries N.V. (Besi, www.besi.com) and develops and produces machines for the semiconductor industry. Besi employs around 1,500 people worldwide. Meco has outsourced the production of its plating machines to its sister company in Malaysia. Besi's customers are worldwide leading producers of chips and their suppliers. The Drunen location employs around 50 people.

For our Process Technology group we are looking for an ambitious

Process Scientist

The purpose of the position is to develop and innovate processes using in-depth scientific approach. You will do this by checking on feasibility and practical applicability. You will translate customer processes into plating/wet processes. Next to this, you will (partially) coordinate projects independently or assist the project leader in organizing and planning the execution of assignments.

You will be part of the Processing Technology team in Drunen of five and will report to the Team Lead.

We are looking for

- A candidate with a Master in material science, applied chemistry or electrical engineering
- Preferably with knowledge of the semiconductor industry and 3-5 years of working experience in a similar environment
- Good command of English
- Willingness to travel occasionally

Next to these requirements, we are looking for someone with a 'can-do' mentality, who is open for change and flexible and has strong communication skills on several levels.

Further information

If you would like further information about this position please contact Arjan Hovestad, Team Lead Process Technology; tel (+31) 6 21 134475 or arjan.hovestad@besi.com.

Apply

If you are looking for a challenging position in an experienced team with room for personal and professional development then we invite you to send your resume and motivation letter to hr.besinetherlands@besi.com.
